

Rest on CosyPUR[®] Visco: More Comfort, Better Relaxation.

**Dreamlike sleep – spa
feeling ensured.**

On the stuff dreams are made of.

CosyPUR® Visco moulded viscoelastic foam means restful nights and relaxed mornings.

Pillows, mattresses and mattress topper pads made from CosyPUR® Visco work like a spa while you are sleeping. Viscoelastic flexible foams are characterized by their slow recovery. They provide an ideal support for the body and utmost comfort when sitting or lying on them.

Depending upon the individual requirements the consistency of this viscoelastic foam can be finely adjusted. Soft or firm, flexible or slow – everything is possible with this intelligent material. Moulded parts used in orthopaedics particularly benefit from its versatility.

Those placing more value on relaxation than stress should definitely lay more than just their head on CosyPUR® Visco.

Relaxing reasons for CosyPUR® Visco:

- Moulded density from 40 to 250 kg/m³
- Adjustable hardness and recovery properties

- Air permeable
- Viscoelasticity retained over a wide temperature range
- Excellent long-term characteristics
- Low emissions
- Flame-retardant alternatives and versions containing renewable resources (CosyPUR® BALANCE) are available
