## Elastopan® 5291TW

### *Wider Processing Range*

BASF is now introducing a new and refined gel called Elastopan® 5291TW. This innovative gel establishes a wider processing window on the production line. BASF has reformulated 5291TW to **enhance flowability, increase productivity, and create ideal storage stability**. Elastopan® 5291TW can be added to conventional flexible foams and viscoelastic foams utilizing various configurations of liquid laydowns. The gel is equipped for all foaming processes; however, it is uniquely suited for the CO<sub>2</sub> foaming process. The gel runs extremely well in this type of process compared to previous generations of gels by eliminating the issue of clogged filters. It results in a very fine and soft feel for the foam and continues to provide the cooling effects for the finished product.

THE DESCRIPTIONS, DESIGNS, DATA AND INFORMATION CONTAINED HEREIN ARE PRESENTED IN GOOD FAITH, AND ARE BASED ON BASF'S CURRENT KNOWLEDGE AND EXPERIENCE.
